

In order to better protect your computer Holly Technologies Inc. has installed a program that will help you keep your computer spy ware free. Adaware is **Free** for the home user. There are upgrades that include automatic scans and a spyware blocking agent at www.lavasoft.de.

AdAware

This program has been installed to scan your system for spy ware. Spy ware is software that may haven been installed on your computer with out your knowledge. This software may do several things. It can track your actions on the internet and send info back to a database to send you spam or pop ups. It may use your internet address to send spam to millions of other people. It may contain code that could damage your programs. All of these programs slow your system down , even prevent you from accessing the internet or prevent you from loading programs and updates. It can even take control of your machine.

To Start program

Program can be started by double clicking on the AdAware Icon on your desk top or by using the programs menu under Lavasoft.

Program Update

Before you run a scan always check for updates by clicking "Check for updates now", see figure 1. Make sure your are connected to the internet before continuing.
